

**REMARKS**

**Summary of the Office Action**

Claim 25 stands rejected to under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 5,969,779 to Kim et al.

**All Claims Comply with 35 U.S.C. § 102(b)**

Claim 25 stands rejected to under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 5,969,779 to Kim et al. This rejection is respectfully traversed because Kim et al. does not teach or suggest all of the features recited in claim 25. For example, claim 25 recites, amongst other features, a plurality of data lines crossing the gate lines and having alternately different extended lengths to the pad region.

In contrast to the presently claimed invention, all of the data lines in Kim et al. have the same lengths to the pad region. The plan arrangement of the data lines in Kim et al. is the same as the related art data lines shown in FIG. 3 of the present application. Applicants respectfully submit that Kim et al. does not teach or suggest data lines having different extended lengths. Further, Applicants respectfully submit that Kim et al. does not teach or suggest data lines having alternately different extended lengths. Thus, Applicants respectfully assert that Kim et al. does not teach or suggest all of the features recited in claim 25. For at least these reasons, Applicants respectfully submit that the 35 U.S.C. § 102(b) rejection of claim 25 should be withdrawn.
